REQUIREMENTS FOR GAMING

- SERVER
  Server is important because it connects user to gaming platform so that he could play online.

- GUI
  If GUI in gaming is better and if the user gets best experience through it the economic value of the game will grow.

- HARDWARE
  To download the game we need space in mobile or computer so we need hardware as it consists memory card.

- SOFTWARE
  Software is important because through software programs we can connect user server to gaming platforms.
